

SAMPLE

2011 Vancouver Workshop Participant Worksheet

Name: Natalie Villalobos

Organization: 300 Acres

Challenge: Save 300+ acres of Amazanga ancestral land - Fundraise to buy 300 Acres

Overall goal of map: Show donors impact of individual

contributions and track progress of fund raising.

What data do I have?

(examples: spreadsheets, GIS data, GPS data, photos, videos, etc.)

1. boundary of 300 Acres. (KML file)
 2. donor names and how much they contributed
 3. _____
 4. _____
 5. _____
- (add additional data to end of document)

What tool(s) will I use?

(examples: Google Earth, Fusion Tables, Charts API, etc.)

1. Google Maps - My Maps
 2. _____
 3. _____
- (add additional tools needed to end of document)

SAMPLE

My "To Do" List

(examples: refining/cleaning data, uploading data, styling data, recording audio for tour, etc.)

1. Create new My Map
2. Import KML of land boundary
3. Add a placemark for each donor. Style placemarks and infowindows
4. Create website and embed map.
5. Plan and launch online fundraising campaign.
(add additional to-dos to end of document)
6. As new donors come up, add to map.

What will I do today? _____

- Create map

- import KML boundary

- add placemarks for 30 donors, start styling for placemark icons and infowindows

Estimated completion date: One week from today (to launch campaign)

Questions for Google Earth Outreach team: _____

Can I embed the map on any website?

What permissions settings should I use on my map?

Is there a way to bulk import all my donor info

from a spreadsheet? Page 2 of 2
